Happenings in and Around Frank

T. E. Sutherland, of Vancouver, is in town.

S. A. Mills came down from Fernie on Saturday.

J. H. Wright, of Wright Bros., Michel, spent Dominion day in town.

Mr. and Mrs. H. A. Gunn, of Livingstone, spent Sunday in town.

R. H. Burn and A. M. Connelly, arrived in town from Gilligheim on Saturday.

W. A. Boreham, head draftsman for the Central Pacific Railway Co., spent last week end in Frank.

Mr. and Mrs. D. D. Chester, of Guelph, Ont., arrived in town on Dominion day and are staying at the Rocky Mountain Sanatorium.

Mrs. Ross, representing the Women's Missionary Society, was in town last week and spent several days here in the interest of her society.

Ice cream and refreshments will be served on the verandah or the inside of the Rocky Mountain Sanatorium every Sunday and Wednesday.

Mrs. E. T. Saunders and Mrs. A. M. Myden came up from Pincher Creek on Dominion day and are registered at the Rocky Mountain Sanatorium.

Captain and Mrs. Dougall, parents of James Dougall, purchasing agent for the Leith Collieries at Newcastle-on-Tyne, Birkenhead, England, last week end and paid a visit to Frank on Saturday.

Amongst those who came up from Lethbridge, on Saturday evening to spend Sunday at the Rocky Mountain Sanatorium were: Mr. and Mrs. H. G. Keith, Miss A. M. Tilley, W. G. C. Clibbour, W. R. Dobbin, W. A. Gibbons, F. O. Hyde, E. M. Gibbons, H. Travis, F. Cameron and O. Z. Smith.

Miss Ball who arrived here two weeks ago with Mrs. Ball, from Godrich, Ont., on a visit to Mrs. H. B. Clearhue and friends at Frank, left this week for Missoula, Mon., where she will visit Mr. and Mrs. Silverman, formerly of this town. Mrs. Ball will remain in Frank for several weeks.

Coleman Notes

C. F. Dunlop and McK. Hunter were in Calgary this week taking in the exhibition.

A large number of the local Orangemen are going to celebrate the 12th of July at Lethbridge.

John Stafford has returned from Raymond at which place he was working on the Raymond Rustler.

The local order of F. O. E. held a celebration on July 4th and continued it until the following evening.

Robert Holmes was in Blairmore on Sunday evening and conducted service at the Presbyterian church there.

Business seems to be brisk here in the tailoring line. We have two tailor shops and the tailors report numerous pressing engagements.

J. B. Hall has resigned his position as town policeman and secretary-treasurer of the town council, and Coleman is now advertising for a successor.

Two guardians of the peace(?) got into a little squabble on Main street on Tuesday evening which resulted in the smaller one being pushed off the sidewalk. Another case of the strong suppressing the weak.

Dominion Day at Bellevue

The second Dominion day celebration was held at Bellevue last Saturday and was attended by about a thousand people. It was a splendid success and those who were in charge of that annual event are very pleased with the result.

The programme started at 10.30 a.m. and the first events pulled off were foot races. These were kept up until 12 o'clock when an adjournment was called for lunch.

At 2.30 p.m. the children, led by a rig loaded with candies and oranges, paraded round the football field. After the parade, candies, oranges, etc., were given to the children.

At 2 p.m. one of the greatest events of the day took place when the Coal Creek all-Stars commenced a league game with the local football players. The visitors won the toss and kicked down hill. About twelve minutes from the start, Coal Creek got a corner kick and missed the goal by about six inches. The Bellevue players then took the ball up the field and Varley put it through, but the Coal Creek players were not willing to call it a goal and after a delay of ten minutes, play was resumed. After half-time both teams put up a good game and Sloan playing well. In the second half Varley scored another goal making the result 2-0 in favor of Bellevue.

The programme of the field sports, the names of the winners and the prizes received are as follows: 100 yard foot race—Hutton, \$10; J. Owen, \$5; 140 yard race—J. A. McDonald, \$5; W. Sihoon, \$2.50; 50 yard boys race under 9 years—G. Ford, \$1.50; A. Varley, 75c; 50 yard boys race under 12 years—A. Knowles, \$1.50; A. Beck, 75c; 50 yard boys race under 16 years—E. Atkinson, \$2; N. Smith, \$1; 50 yard girls' race under 9 years—B. Knowles, \$1.50; M. Hallworth, 75c; 50 yard girls' race under 12 years—E. Bosley, \$1.50; M. Anderson, 75c; 50 yard girls' race under 16 years—E. Bosley, \$2; M. Petrie, 50c; F. Hallworth, 50c; 100 yard foot race, Bellevue F. C.—I. Hutton, \$5; W. Sihoon, \$2.50; 50 yard married women's race—Mrs. Hill, \$3; Mrs. North, \$1.50; 75 yard old men's race, 50 years and over—Mr. Dodd, \$3; M. Chappell, \$1.50; 50 yard egg and spoon race for women—Mrs. Beck, \$3; Mrs. Bosley, \$1.50; three-legged race—W. and H. Sihoon, \$5; sack race—Mr. Meikin, \$3; running high jump—W. Wilberg, \$4; standing broad jump—J. McDonald, \$4; Kicking football—H. Fisher, \$3; tug of war—McKinnon & Co., \$10; pony race (closed)—Brownie, J. Cameron, \$10; Rusty, G. Miller, \$5; Horse race (closed)—Queen of the Wood, W. H. Chappell, \$18; Baldy, J. Eddy, \$7; Horse race (open)—Queen of the Wood, W. H. Chappell, \$23; Lark, H. Eshon, \$10; Pony race (open)—Queen of the Wood, W. H. Chappell, \$15; Brownie, J. Cameron, \$8.

After the sports a smoking concert was held in the company's hall. J. Lindsay was the chairman and the following gentlemen contributed to the programme: Mr. Moorhouse, Mr. McQuinn, J. Douley, R. Archer, W. Rochester, W. Cluff, A. Moores, P. Kennedy, C. Shrater, J. Lindsay, T. Cluff, H. Cameron, H. Varley, T. Bosley and H. Madden. A very enjoyable evening was spent. Much credit is due the committee of the Sports for such a grand time. The secretary was Fred Chappell and the treasurer Albert Padgett.

Never leave home on a journey without a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. It is almost certain to be needed and cannot be obtained when on board the cars or steamships. For sale by all dealers.

Happenings in and Around Bellevue

"Billy" James of Lethbridge spent Saturday in town.

Jonathan Graham came down from Coleman on Saturday.

The hundreds of visitors that were in town on Saturday were well pleased with the Dominion day celebration.

W. J. Bartlett and J. D. S. Barrett came down from Blairmore on Saturday and took in the Dominion day celebration.

We are pleased to learn that Walter Miller, George Couland and Mike Bovis, all of Bellevue, passed at the last miners' examination as first bosses.

The first league match played by the Bellevue Sunflowers and the Hillcrest players was witnessed at the latter place on Wednesday last. The game was fast and the teams were about evenly made up. Thompson put a good shot in from a pass by Varley, thus making the score at the close 1-0 in favor of Bellevue.

On Monday a dance and social evening was given, free to all the camps round about Bellevue, with the surplus money from the sports. J. Poushous was the floor manager, and M. G. Evans catered for the refreshments. The following gentlemen went round the room handing the refreshments out: J. Ford, E. Padgett, A. Padgett, G. Bateman and A. Watson. The following contributed to the programme with songs: D. Hutton, E. Coupland and W. Rochester. Mr. Hadlam, of Hillcrest, was the accompanist. F. Padgett recited. A very enjoyable evening was spent.

LILLE NOTES

(Received too late for last issue)

Sunday, June 23rd, will ever be remembered as a day of great moment in the lives of the many people who joined the Presbyterian church in Lille. Twelve people were received into church, communion on profession of faith, and twenty-three as transfers. The afternoon reception meeting was one of great solemnity and blessing, when those 35 men and women were received into church fellowship by the Rev. T. M. Murray, Coleman; G. H. Wyckler, minister at Lille, and Mr. McKay, Elder, of Bellevue. The communion service in the evening was largely attended. It was a service never to be forgotten. The Rev. T. M. Murray preached at each service.

The Presbyterian church of Lille has every reason to thank God for the many blessings He has carried upon the people during the last few months, and when peace is declared in the industrial world, Lille is looking forward to great progress socially, materially and spiritually.

The Lille day school entered upon their summer vacation. On Friday, June 30th, one esteemed teacher, Miss Naughton, leaves for her home near Toronto, for a much needed rest. The united desire of the camp is, that Miss Naughton will return to continue the capable teaching given to the children in our school.

Happiest Girl in Lincoln
A Lincoln, Neb., girl writes: "I had been ailing for some time with chronic constipation and stomach trouble. I began taking Chamberlain's Stomach and Liver Tablets and in three days I was able to be up and get better right along. I am the proudest girl in Lincoln to find such a good medicine." For sale by all dealers.

What Remains

The coronation is over, the danger of high water is past, the harem skirt is going out of fashion. Remains the strike and the prospects as a subject of chit vibration.—Ferne Free Press.

A Fish Story

A well-known rancher of the South Fork valley gives us the following report of a fish he caught recently: "It measured 42 inches in length, 23 inches girth and contained five other fish of varying length, each measuring over 18 inches in length." From this story, which is one of the kind generally handed to the confidence of the local newspaper, one may judge that the originator is a descendant of a Nova Scotia fisherman.

Blemish on Reciprocity

One of the blemishes in the reciprocity agreement is the failure to provide for the free interchange of bituminous coal. In place of throwing the walls down making possible an interchange of coal which would have been advantageous to both countries the Canadian government would only agree to strike 8c a ton off the duty, making the Canadian rate identical with that of the United States—45c a ton. But even this slight reduction offends the Canadian industry, which is the most ardent advocate of protection run mad in Canada. "It is difficult," it says, "to understand what was the motive of the Canadian government in agreeing to the reduction of the duty on coal." Free trade in coal was provided for by the standing offer which was on the Canadian statute book from 1879 to 1894. It would be just as practicable and beneficial to-day as it would have been then.—Winnipeg Free Press.

The Slanderer

"Slander, that worst of poisons, ever finds
An easy entrance to ignoble minds."—Harvey.

It is to be regretted that there are in our midst some who resort to such low and mean things as to endeavor to injure the good reputation of some individuals by circulating false and damaging reports regarding their character. The despicable person who will stoop to such a level is about the most useless cuss that ever saw the light of day, and that light should reach him only through windows strongly bolted with iron bars, for that is where he will eventually find himself if he continues to defame those who are without a flaw in their character.

It is, perhaps, not generally recognized that the libel which appears in a newspaper is the least harmful of all attacks upon private character. The blow is delivered in the open; the person struck may strike back, may vindicate himself in the courts; but a story circulated through private gossip may travel and gather strength and venom for months and years without the victim being made aware of the mischief. He may find friends growing cold without suspecting the cause.

Our Day Schools

On Friday last our public school closed for the summer holidays and all the boys and girls are heartily glad that summer has again rolled around, whereby they may by aside their school books for a few weeks and enjoying themselves basking in the sunshine which prevades the atmosphere of Sunny Southern Alberta, and feasting on the rich beauties of The Pass.

Our town has one thing which she is justly proud of and to which she largely owes her good name, the influence of our schools. They have sent out a class of young ladies and gentlemen that are wielding a power for good and most successfully filling the best places and positions in life.

There is no more efficient aid to morality, honesty, sobriety and good citizenship than well-conducted public schools, and it is the part of wisdom to put these schools up to the very highest point of excellency, and to do this there must be harmony of four elements, viz: the school board, the patrons, the scholars and the teachers, and without which perfect success cannot be attained, therefore, let it be the duty of these four elements to see that no deficiencies or hindrances arise on their parts to thwart the good purposes of our schools.

If fractions exist, pray disband, and give your hearty sanction and co-operation to the efforts being made to maintain the excellencies of our school today and so enhance its interest that it shall stand second to none in the land.

A Calamity

"I suppose we will soon be hearing the joke about the big fish that got away," we remarked to a Waltonian the other day.

"My friend," replied the fisherman, "with food at present prices, the fish that gets away is not a joke. It is a calamity."

Editorial Notes

Saturday was a good time to have taken the census of Bellevue.

In spite of the fact that the Nelson Board of Trade has taken the matter in hand, the strike remains unsettled.

All gossipers are bad enough but deliver us from a person who rattles, one who from envy and jealousy will attempt to blight the fair name of those who are without fault. Shun a tattler as you would a rattle snake.

Let us stand by the schools as they now are. Let us set forth their advantages. They create a desire for knowledge. They teach the equality of all Canadian citizens. In them the rich and poor stand upon the same level.

The man is a variety these days of whom it can be said "there is no flies on him" for they are everywhere; but twenty drops of carbolic acid evaporated from a shovel, so we are told, will banish them from a room quicker than all the sticky fly-paper in existence.

Simply Marvellous

A special press notice, from Montreal, marked "rush" reached our office safely on Friday last, despite the fact that it only contained the covering of an ordinary wrapper supported by a neat double of nine-thread manilla rope, and the postal authority's guarantee of delivery—a two-cent stamper. Dominion postal department seems to be doing its duty these days.

The Gun Club

The following is the result of the shooting done by the Blairmore Gun Club on Wednesday evening last out of a possible 25:

Class A—	
J. S. Murray	20
Sergt. Bowers	17
R. McGowan	11
Class B—	
A. Morency	15
J. D. S. Barrett	12
W. M. Wetmore	12
J. F. Miller	11
C. Jardine	10
A. V. Lang	5

Beaver Creek

The grading for the Pincher-Beaver Creek railway is well under way, and at present the railway camp is located about midway between Mountain Mill and Beaver Creek, while the grading is completed to within two miles of the townsite.

On Sunday last we had the pleasure of a trip to Beaver Creek, and the South Fork country, and were surprised at the healthy appearance of vegetation, as well as the numerous croppings of coal under prospect, much of which is of the peacock grade.

Preserving Strawberries and Raspberries for sale at J. S. Murray's.

For summer diarrhoea in children always give Chamberlain's Colic, Cholera and Diarrhoea Remedy and castor oil, and a speedy cure is certain. For sale by all dealers.

Meals served at all hours at J. S. Murray's.

Providing for the Through Trip

Life is a journey. This is a little metaphor, but it is true because it is true. We are each in charge of an engine, which we call the body, and this engine needs fuel, which we call the necessities of life. There are comforts and luxuries which we all desire, and these we may like to patent attachments and brass and nickel works which reduce the jolts of the journey or give style to the rolling stock.

We find it easy in youth to provide the coal and water as we go along, and to keep the locomotive looking trim. We fly gaily past the stations which we call birthdays, and willingly pick up passengers here and there for whose comfort and safety we become responsible.

Sooner or later the engine runs into an open siding. You know what that means. If it is along the first part of the trip there are passengers left in need of a conveyance. Life insurance has provided the means whereby the young engineers may guard against an early derailment. The benefits of these provisions cannot be over-rated; he is an imprudent driver who neglects them.

There are other contingencies which may arise before the open switch is reached. One of these is the possibility that the journey for the individual may be longer than the average run, and a point be attained where the hand becomes lax at the throttle, and the worry of where to get fuel for the engine presses hard on the man in charge. This is the contingency that the government of Canada had in mind when it devised its Old Age Annuity scheme—a scheme whereby the surplus means of youth, and a wise man will find some way to have a surplus, may be kept in store for the needs of age.

The government has foreseen your needs, and anticipated the requirements for your journey. You entrust to the Government some of the savings you can make when your supplies are in excess of your demands, and the Government assures you cooling stations beyond the fifty-fifth milestone.

The open switch may not appear in your path until long after the twentieth station has been passed. Nothing is more pitiable than to watch the old engines, which cannot leave the tracks if they wish, trying to ascend the grades at the last stages of the journey of life, or to see some of the passengers, once travelling in comfort, now forced to walk the tracks. Friendly companions may give them a lift, or others may push them along grudgingly as a duty. An Annuity may not restore to you the speed of youth, but it will retain for you its independence. If you are concerned, as you should be, with the problem of how to provide for that "last of life" for which the first was made, you should ask for schedules at the government Annuities Branch, Ottawa. The Government of Canada has shown its faith in the idea of providing against the needs of the last stages by appropriating \$70,000 annually to educate the people in the habits of thrift. This appropriation is paid out of the revenues of the Dominion, and not one cent of it is repaid out of the purchase money received from the annuitants.

The people of Canada have shown their faith in the scheme by paying to a million dollars to obtain the benefits offered. How many, however, are still running the journey of life blind to the fact that they may need the protection which this scheme affords! Have you the fare for the through trip?

Sprains require careful treatment. Keep quiet and apply Chamberlain's Liniment freely. It will remove the soreness and quickly restore the parts to a healthy condition. For sale by all dealers.

A stalk of wild timothy, measuring exactly six feet in length, was taken from the Beaver Creek valley recently.

THE RED HEIFER

It Was the Cause of an Abundant Mistake

By Clarissa Mackie

Copyright by American Press Association, 1911.

"It certainly has our brand," persisted Gabriel, referring to the solitary red spot in the landscape.

"As well as three other brands," added Jim Lewis.

"Then why does the Widow Clancy lay claim to the critter?" demanded Jim Lewis scornfully.

"She says it's a stray," explained Harry Barry. "Seems her foreman told her that a critter that had as many as four different brands could rightly be claimed by anybody that found it."

"Who's the foreman?" asked Gabriel incredulously.

"Peter Henry."

"I'm wondering how he managed to fasten his thieving claws on the widow's money bags."

"She came out pore in health with a long little arm that had been let to her by Clancy, who was in the building line somewhere east. I don't think she's a 'lunger' exactly, but Mrs. Clancy said she'd been herself out over taking care of Clancy, and tell from the ninth story of building he was putting up and lived ten weeks afterward. You can imagine what a tough specimen Clancy must have been. You might know 'twould wear the toughest kind of a woman to skin and bones to take care of him." The Crane pulled solemnly at his cigarette after the long exhalation.

"How'd you come to know so much about the Widow Clancy?" demanded Harry Barry suspiciously.

"I talked with Mrs. Clancy about her. Seems Mrs. Ross she'd been over to call on the widow," said the Crane innocently.

"Anybody seen the widow yet?" inquired Jim.

"There was silence for several seconds, and all eyes were turned to the Crane, who was starting out across the range."

"For the Lord's sake," he broke out irreverently, "let's make the Crane make out for Stan's guinea! Whoop!"

"His horse swung around to a quick touch, and before the Crane could draw breath he was dashing after the red spot, which was gradually becoming smaller. In another instant they were all after him."

"The red heifer switched her tail lazily and capered joyously ahead of the pursuing gentlemen."

"Crane," called Jim Lewis in that gentleman's ear when he had come abreast of him, "you're running the red heifer off the widow's range!"

"I'm not," the Crane retorted, "I'm running away, and I'm trying to catch her before she breaks her neck in the gulch." Crane tossed back over his shoulder.

"The red heifer gambled in the van, occasionally pausing to bellow back an impudent defiance to her pursuers. Gabriel explained in breathless shouts the different brands borne by the heifer as if all the Lone Haul men were not acquainted with the itinerant creature's marks of identity."

"The red heifer had been the pet amusement of all the cattlemen in Poudre county for six months past. Lately her sudden appearance among a herd was the signal for a stampede for the branding iron that would mark her for the time being as the possession of the richest man in the brand."

"The red heifer had been the pet amusement of all the cattlemen in Poudre county for six months past. Lately her sudden appearance among a herd was the signal for a stampede for the branding iron that would mark her for the time being as the possession of the richest man in the brand."

DAMES AND DAUGHTERS.

Miss Pola La Follette, daughter of Senator Robert M. La Follette, has written a play with womanly stuff as the dominating motive.

Miss Dupont, a fashionable photographer of New York, is the widow of the French sculptor whose work was notable in Paris several years ago.

Dr. Valfrid Palmgren, the woman member of the municipal council of Stockholm, is said to be responsible for that body voting 2,000 crowns to be used in entertaining the coming congress of the International Woman Suffrage alliance in that city.

Miss Clarence Bixby of New York is president of the Little Mothers' association, which was formed to take care of the little girls who must mind the baby and do the housework while their mothers are out earning a living. The society takes care of the babies for the little mothers and lets them go to school.

Miss Fannie Bixby of Los Angeles, Cal., has served as special police officer at Long Beach for more than two years. Before her father was police officer she is probation officer connected with the juvenile court and a member of the juvenile court commission. Miss Bixby is a Wesleyan graduate and the daughter of a wealthy family.

The Writers.

Paul Heyse, the German novelist, who won last year's Nobel prize in literature, is recognized as a master of his art in his own language. He has been a writer for sixty years.

The death of Rudyard Kipling's mother in the early seventies accentuates the fact that the son nearly twenty-five years after his first literary success, is still essentially a young man. As a matter of fact, he is only thirty-five years old.

Edith Wharton, the novelist, was born in New York in 1862 and married Edward Wharton of Boston in 1885. Her first story was published in 1890. Since that time her industry has never flagged, more than a dozen volumes having come from her pen, though some of them were not short, but records of travel.

Salads.

Shredded salted nuts—the kind that come stale—improve the appearance as well as the flavor of the apple and celery salad if a dozen are sprinkled over the top.

In making salads do not chop your meats and celery in a chopping bowl. Cut into the desired sized pieces with scissors. This is quicker, neater and cleaner than the old way.

For delicious chicken balls for the salad course select a dry cream cheese moisten it with olive oil and cream, mix with it minced parsley, salt, paprika and sugar and form in balls.

Sporting Notes.

McKinnis, champion trotting sire, has thirteen performers in the 2:10 list.

John McGraw is "coming back." The New York manager says he will play in many of the earlier games.

Foot racing is popular in South African sport. The 100 yard dash between Donaldson and Walker drew 20,000 spectators.

Battling Nelson is planning a trip around the world. He will box in China, Russia and Japan, as well as in all the English speaking countries.

Tales of Cities.

Chicago has thirty-three church organizations engaged in outside work for the social and moral development of the community.

The growth of the German city of Frankfurt, now officially estimated at 400,000, has been as rapid for the last twenty years as that of any of our western cities.

New York hospital records show a greater proportionate increase in insanity than in the population. Alcoholism has increased more than doubled in the last dozen years.

Cost of Living.

The fact that an egg has the nourishment of a pound of beef doesn't excuse meat prices for eggs—Atlanta Journal.

The cost of living does not come down quite as if both wings were shattered and the rudder tangled in the propeller blades. There is, indeed, no money—haste—Cleveland Plain Dealer.

The Whisk Broom.

New York's health commissioner says there is death in the whisk broom. It can sweep dirt, but it cannot sweep away R.—Toledo Blade.

The health commissioner of New York says that there is death in the whisk broom. It can sweep dirt, but it cannot sweep away R.—Toledo Blade.

MYSTERY OF LIGHT

Some Luminosity So Intense the Eyes Cannot See It.

THE RIDDLE OF THE FIREFLY.

So Far It Has Baffled Science, but When It Is Solved, as It Eventually Will Be, We Shall Have Light Without Heat and the Perfect Lamp.

The scientist set down a small black box and impatiently pushed aside the powerful microscope and the delicate bolometer. "It is most discouraging," he muttered, "to have such a treasure before one's eyes and still be unable to grasp it."

I looked in the little box, surprised to find nothing but a few brilliant fireflies. The scientist began to explain.

"In that box is the most efficient illuminant known to man. The radiant output from one of those insects corresponds to nearly fifty watts a candle, while our very best artificial illuminant, the flaming arc lamp, gives only two watts a candle. In fact, the light from those insects, as recorded by the bolometer, radiates little if any heat, while the very best incandescent lamp wastes more than 90 per cent of the electrical energy in useless heat. If I could read this secret of the firefly, I could produce 350 candle power from the same current that gives sixteen candle power today. Some day the secret will be revealed."

The source of all light (except the light from fireflies and their kin) is a substance raised to a temperature so high that it radiates light. In the sun, for example, the temperature is so high that it radiates light. In the sun, for example, the temperature is so high that it radiates light.

By a Baseball Fan

Blairmore baseball boys met their second defeat for the season, at Pincher Creek, on Wednesday evening last. The score being 10-2, and it was not Blairmore's fault that Pincher did not get more runs, as the Blairmore boys did not go out to win baseball, but were more anxious to win soup of Pincher Creek's fair hands.

Hughes and Benson have probably the biggest room to complain. The farmer, after getting mixed up in a proper hole on a sprint to first base, was allowed second on a pass ball, he then made an exciting run passing third and reaching but was called for making the run, while Benson got two bad fingers the result

of trying to let a thrown ball past.

The game was given away by our boys in hope that we could get Pincher to give us a return game.

The game was postponed from the afternoon until evening, thus giving the Blairmore boys lots of time to have a look at Pincher. Dallas was the first to break the ranks. He was soon followed by three others. Two of the boys got mixed up in an automobile while another got in amongst some of the wires. Two other boys report having a very pleasant time on some of those hills over looking Pincher.

New Zealand's first gift of a dreadnought to the Imperial navy was launched last Saturday.

OUTLOOK IS NOT CHEERFUL

Miners and Operators Refuse to Accept the Award of Conciliation Board

THE SITUATION IS UNCHANGED

Neither Side Being Bound by the Suggestions or Findings of the Board

An advance in day wages of 10 per cent. up to and including \$3.8 per cent. up to and including \$3.50, and 5 per cent. above that figure; differential in pillars of 5 to 7 cents according to conditions, application left to arbitration. Contract rates to remain unchanged. Advance in contract rates at Lethbridge of 3 per cent., readjustment at Lillie by making rates proportionate to seam. All other matters to be disposed of as the board shall direct. Such was the basis upon which chairman Gordon at Banff on Saturday last, fixed for the miners and operators to get together upon an agreement to govern the working of the mines in this district.

Since the foregoing has been offered by Chairman Gordon as a proposed settlement of the coal miners' strike, both parties to the dispute have registered an unqualified refusal to consider the said proposals. Neither side being bound by suggestions or findings of the board, the situation is where it was in the beginning.

The operators submitted a brief written rejection of the proposals stating that they contained terms and conditions to which they could not assent. Mr. Stubbs, on behalf of the miners, said they had no written statement to make but were ready to state verbally that the mine workers could not consider the offer made upon any way as the basis of agreement.

A. J. Carter entered a formal protest against the manner in which the Saturday proposal had been submitted and stated he could not consider the proposition as a fair one.

The South Fork Country

John Angus MacDonald, one of the coal magnates of the South Fork, came in to town this week and reports development work at all the coal camps at the South Fork very brisk. A number of engineers and surveyors are in that section of the country with a view to hasten the building of a railroad through many of the valuable coal properties there. Mr. MacDonald believes that within a very short time the South Fork country will equal any other part of the West in the production of high-grade coal. The quantity is there and the quality is there, and all that is needed now is some means by which the coal and coke may be shipped to the marts of commerce.

The average man would rather be a captain of industry than an army general.

TWO MEN KILLED AT BELLEVUE WEDNESDAY

Thomas Rawson and J. Pasquale Meet Death in the Mine

A serious accident occurred at Bellevue on Wednesday morning, which resulted in the death of Thomas Rawson and Joseph di Pasquale.

The sad affair happened at 9 o'clock when the two unfortunates were on their way to work in the mine. The accident was caused by a car jumping the track at 64 chute, at No. 1 seam, striking the props and causing several tons of coal to come down, completely burying the foremost car and crushing its occupants.

Those who were in the other cars immediately rushed to the assistance of their fellow workmen who were buried in the debris, and in a very short time succeeded in removing them from their incarceration. Two were taken out alive but life was extinct from Rawson and Pasquale and their bodies were forthwith taken to the wash house.

T. Rawson, was up to the time of the strike, a fire-boss at the Blairmore mines and he had only started work at Bellevue on Monday last and did not work at all on Tuesday. J. di Pasquale is an Italian and had arrived from Spokane about two weeks ago. He had only worked at the Bellevue mine the same length of time that Rawson had.

A Runaway Frightens the Crowd

Early in the afternoon of Saturday last, while about six hundred people, old and young, were swarming about on the football grounds at Bellevue, a horse became frightened, tore itself from where it was fastened and rushed madly over the grounds amongst the spectators threatening to trample under its heavy hoofs a number of small children who were standing nearby, and intense excitement reigned for a few minutes. The steed, after making a large circle, dashed off the field without causing any serious damage.

The Glorious Twelfth

The glorious and immortal memory of King William, the Third, will be celebrated by a number of the local Orangemen at Lethbridge. Cheap rates over the C. P. R. have been arranged for and the brethren will leave on the "passenger" on the evening of July 11th or else leave on the "flyer" early Wednesday morning. It is expected that the Orangemen at Lethbridge will do all in their power to make the day a pleasant and an enjoyable one for all who will attend.

PICKED UP—In the Blairmore Opera house on Saturday last, three safe-drawer keys on a string. Owner can have same by calling at this office, proving property and paying for this ad.

LARGEST IN THE DISTRICT

The Blairmore Opera House Was Opened on Friday Evening by the Tennis Club.

T. FRAYER AND W. A. BEEBE

Chief Promoters in the Erection of Blairmore's Spacious and Splendid Opera House

The large and splendid opera house recently erected by the Blairmore Opera House Company, Limited, received its first public gathering on Friday evening last, when the Blairmore tennis club gave a successful dance which was attended by about two hundred and fifty people. The floor was in good condition, the music was supplied by the Coleman orchestra and everybody seemed happy.

This building is one hundred and ten feet long, forty-six feet wide, is having a full-sized basement completed, has a large balcony and is the largest building of its kind in the district. The interior is being finished in the most artistic style. Beautiful hand-pointed curtains, besides one made of asbestos, have been ordered and will be placed in position as soon as they arrive from the makers.

Those who for the first time saw the Blairmore opera house on Friday night last were loud in their praise of the splendid building, and congratulated Mr. Frayer and Mr. Beebe, for being the chief promoters in establishing such an attractive and commodious place of amusement in the central town of The Pass.

Spur Line Completed

The spur to the Blairmore Brick Works is now completed and several cars of their product have already been shipped over the new spur to the main line. The spur, which is sixteen hundred feet long, runs from the Blairmore Brewing Company's property to the West Canadian Collieries spur which connects directly with the main line of the C. P. R. The new track was first used on Friday and means a big saving to the brick company in carting their products to the railroad for shipment.

Another Brick Building

On Tuesday morning, Frayer & Sinclair put a number of their men at work at the corner of Victoria street and Ninth avenue where a brick building is being erected. This new building will be forty-five feet long and twenty-five feet wide. It will have large plate glass windows and will have a very attractive appearance.

Right in your busiest season when you have the least time to spare you are most likely to take diarrhoea and have several days' time, unless you have Chamberlain's Colic, Cholera and Diarrhoea Remedy at hand and take a dose on the first appearance of the disease. For sale by all dealers.

Ranch, Blairmore, West.

Here and There

Twenty-five years ago last Thursday the first transcontinental train of the Canadian Pacific railway pulled out from Montreal for the Pacific coast.

Claims for damages amounting to \$3,500,000 have been filed with the executive council by the Alberta and Great Waterways railway project against the provincial government.

The corner stone for the first Lutheran college to be erected in Canada, was laid at Camrose on Dominion day. The present building is one of three to be erected at a total cost of \$100,000.

Dalmore distillery, near Glasgow, was burned on Monday causing a loss of \$5,000,000. A remarkable spectacle was furnished by a stream of burning whiskey running from the flame swept building into Cronarty Fifth.

Two earthquake shocks, the heaviest since the big quake in 1906 and separated by only a few seconds, jarred the central and western portions of Nevada on Saturday last. Only trivial damage has been reported from any section but in San Francisco and other cities in the affected area, panic seized upon crowds in stores and restaurants and there was a pell mell exodus from the large buildings.
